

## 10.30.19 Reflection - Danielle Neal

### 1. Exercise:

### 2. Related Article: <https://textblob.readthedocs.io/en/dev/quickstart.html>

This week, I chose to learn more about text blobs and how they work. This article included a few functions for text blobs that were useful in the process of completing (well, attempting to complete) Lab 2. This article and the functions within it helped me do #3 on Lab 2, but I'm working on finding more examples for questions 4 and 5.

### 3. List o' Problems:

This week I'm having trouble with the time intensive nature of these projects. Unfortunately, my personal laptop computer is a bit dated, so I'm way more comfortable working on lab computers to do these assignments. The campus only being open certain hours combined with the labor intensive process of remedying error messages has made it difficult to do Lab 2, as it took much more time than I had to dedicate to coming to campus and being in a lab (7 hours).
